RESEARCH INTERESTS

My primary research interests lie in Reinforcement Learning and Stochastic Optimal Control. Recently, I started exploring the role of Game Theory in making Multi-agent Reinforcement Learning algorithms more practical to real world applications.

Amongst the application domains, I am interested in Supply chains, Smart grids and robotics. On the software engineering side, I built several Blockchain based solutions for Supply chain Finance and Auto manufacturing sectors. I am currently building AI based solutions for various use-cases in supply chains. More broadly, I am excited by research at the intersection of computer science, mathematics and software engineering.

EDUCATION

Indian Institute of Science M.Sc(Engg). in Computer Science, Advisor: Prof. Shalabh Bhatnagar – Thesis: Stochastic Newton methods with enhanced Hessian estimation	Bangalore, Karnataka 2014 - 2017
NRI Institute of Technology B.Tech. in Information Technology, Advisor: Dr. Viswanath Pulabaigari – Thesis: An Improvement to k-Nearest Neighbor Classifier	Guntur, A.P 2008 - 2012

EXPERIENCE

IBM Research India Research Engineer position at AI for Supply-chains Group Projects: AI for MEBNs, Blockchain Solutions – AI based analytics for Sterling Commerce Multi Enterprise Business Networks – Led the development of IPDC Supply Chain and Dealer Finance Blockchain Platform – Invoice Reconciliation Using Blockchain for Bajaj Auto Limited first of a kind project	Bangalore, Karnataka Jul 2017 - Current
Robert Bosch Center for Cyber Physical Systems Project Assistant position at Stochastic System Lab under Prof. Shalabh Bhatnagar Project Title: Distributed Multi-Agent Algorithms for Dynamic Control of Microgrids – Explored the role of reinforcement learning for the distributed control of microgrids – I also co-written research proposal along with my project mentor, which is accepted and funded by Department of Science Technology - India – My research work during this period resulted in two top tier publications.	Bangalore, Karnataka Dec 2016 - Jun 2017
IBM Research India Summer Intern position at Mathematical Modeling and Industrial Solutions Group Project Title: Use-cases on Blockchain – Built initial version of invoice discounting (supply chain finance) project for Mahindra & Mahindra on hypeledger fabric 0.6.	Bangalore, Karnataka May - Nov 2016

AWARDS AND ACHIEVEMENTS

- | | |
|--|-----------|
| • IBM Research Spotlight Award | 2020 |
| • IBM Client Value Outstanding Technical Achievement Award | 2019 |
| • IBM Research Accomplishment Award | 2018 |
| • MHRD Scholarship for securing rank among the top 1% in Graduate Aptitude Test in Engineering | 2014–2017 |
| • Secured 2 nd rank during my undergraduate studies in Information Technology Department. | 2008–2012 |

PROJECTS

- Project Title (Technology Used, 2019)
Short explanation of the project

SKILLS

- **Programming Stack:** Python, Golang, Matlab, C
- **Frameworks:** AngularJS, NodeJS, Dash
- **Databases:** MongoDB, Neo4j
- **Tools:** Git, Bash, \LaTeX

TEACHING

- **Teaching Assistant** at Neuromatch Academy,
July 2020
Computational Neuroscience
- **Teaching Assistant** at Indian Institute of Science,
Fall 2016
Algorithms and Programming

REFERENCES

- **Prof. Shalabh Bhatnagar**,
Department of Computer Science and Automation,
Indian Institute of Science Bangalore, India.
E-mail: shalabh@csa.iisc.ernet.in
- **Dr. Viswanath Pulabaigari**,
Department of Computer Science and Engineering,
Indian Institute of Information Technology, Chittoor, India.

- Project Title (Technology Used, 2019)
Short explanation of the project

COURSES

- **Artificial Intelligence:** Reinforcement Learning, Machine Learning, Deep Learning
- Computational Methods in Optimization, Design and Analysis of Algorithms, Introduction to Big Data, Game Theory
- **Mathematics:** Stochastic Models and Applications, Linear Algebra and Applications, Real Analysis
